

 **SunStopper**  
SHADE SYSTEMS  
*Beautiful shading for any budget*

SunStopper Shade Systems provide you with a range of on-demand solar shading products to fit virtually any budget. We offer unsurpassed value on custom made products that will add charm and style to

*your home.*

## The Shade

The Shade retractable awning is designed to provide quality solar protection that is both functional and affordable. This shading system features 100% acrylic fabric in a variety of colors and comes in 3 popular sizes. The Shade includes white or sand aluminum framework and stainless steel fasteners for years of trouble-free service. Two stainless steel arm cables and internal arm springs keep the Shade's fabric taut when extended. The Shade can be mounted on most homes and has an optional protective hood. This unit is available as hand crank manual operation, or for maximum convenience can be motorized.

# The Shadow

The Shadow offers you more customization to create a retractable awning that is crafted to fit your needs. The Shadow's rugged, European designed frame construction will provide lasting beauty for years to come. The Shadow is available at two fabric pricing levels, several frame color finishes and a host of other unique product features. This shading system can be mounted on virtually any surface – on a wall, directly under a soffit or on the roof (when extra height is required). The Shadow can be produced to a maximum of 32 feet wide by 11 feet 6 inches in projection.

# The Silhouette

The Silhouette is our premier model and offers total customization to harmoniously blend with your décor. You select from Sunbrella's wide color palette of 100% solution dyed, marine grade fabrics to express your design needs. The Silhouette is available up to 40 feet wide and five projection ranges up to 13 feet. The twin PVC coated arm cables and internal cold wound, high carbon arm springs exert almost 900 lbs of outward force in each arm to provide you a superior looking awning that is designed to last. The Silhouette offers a wide array of motor and electronic options to complete your shading system.

## The Protective Hood

The optional aluminum, powder-coated SunStopper hood is available on all models. The protective hood matches the frame color and will greatly reduce the elements from affecting your investment when retracted. The protective hood is highly recommended for all roof mounting and fascia (wall) mounting when no direct overhead protection exists.

## Optional Motorization

The way to maximize the effectiveness of your shading system is to order it motorized, providing touch of a button operation. The convenient remote allows you to operate the unit within a 50' range. One button press will extend the awning and stop automatically at full projection. You also have the option to stop the unit in any position when full protection is not desired.

## Fabrics

We use only 100% solution dyed acrylic fabrics which are warranted from rot, mildew and excessive fading. We offer the complete Sunbrella line of marine grade fabrics on the Shadow and Silhouette models.

To prevent the seams from failing, we use Tenara thread by Gore. In using this superior thread, the seams are warranted for as long as the fabric.

## Professional Installation

To provide safe and effective solar protection, proper installation is required. Your SunStopper dealer will design and install a shading system that fits both your budget and needs. Correct installation will provide years of worry-free on demand shading.
